

8' SELF CLEANING CARTRIDGE STYLE BOOTH MODULE SBM8000

APPLICATIONS: FUME EXTRACTION, WELDING SMOKE COLLECTION,
COMPOSITE DUST, CAPTURE DRY DUST/POWDER

HIGH PERFORMANCE DESIGN

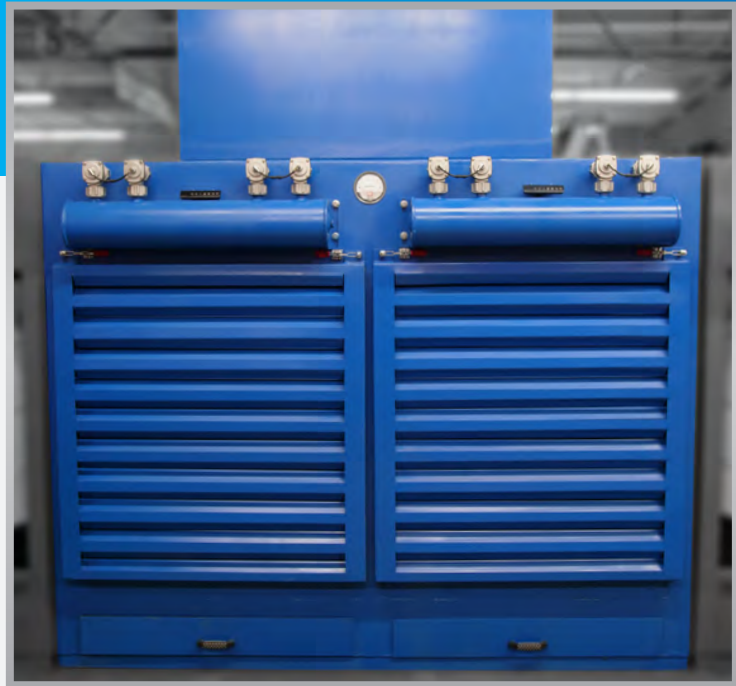

The SBM8000 is a sleek booth module that features 10,000 CFM of airflow out of the gate. Equipped with our exclusive filter actuators, you can raise and lower the filters at the touch of a button for a filter change that only takes a few minutes! The SBM8000 uses high performance, 99.97% efficient self cleaning nano fiber fire retardent cartridges with Power-Pulse, allowing for easy cleaning and unbeatable performance!

VIRTUALLY ANY BOOTH SIZE

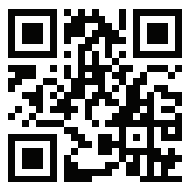

Whatever your needs, the SBM8000 has you covered! Sold individually or equipped with the booth of your choice. Our regain air option effectively doubles the airflow characteristics of the booth with a push/pull design.

POWERFUL, YET QUIET

By using a 7 1/2 Horsepower fan in a larger blower package, we achieve high volumes of airflow without the noise of our competitors.
