

# SD SERIES SPRAY PACKAGE

APPLICATIONS: PAINTING

## HIGH PERFORMANCE DESIGN

We can equip any of our downdraft tables with our **"spray package."** This package includes the following modifications to our standard tables:

1. Encloses the side, top and back of the unit to make it an open face booth.
2. Replace the cartridge filters with a set of panel spray pre-filters, NESHAP 319 final stage bag filter and carbon after filter modules to control VOC's.
3. Use of a Class 1, Div 1 and 2 explosion rated motor and spark proof impeller.
4. Add Protective Mat over grating to protect paint and parts coatings.

### Additional options available:

- Explosion rated lighting.
- Explosion rated controls.

Always check local codes and regulations regarding use of this type of system. Some areas may require additional equipment/features
