

# WELDING BENCH WB2500

APPLICATIONS: WELDING, GRINDING

## SELF-CONTAINED DESIGN

The WB2500 is a compact self-contained welding and grinding booth that features 2,500 CFM of airflow to remove harmful particulates. Work safely with a built in spark arrestor. Our bench features separate controls for both the light and blower for maximum efficiency. The bench also includes 4 additional functional 110 V outlets with GFCI protection, eliminating the need for extension cords.

## ERGONOMIC

The Superior WB2500 is the most ergonomic welding bench ever created. With 5 adjustable work height settings from 26" to 36" and an ergonomically designed filter chamber. Perfect for schools and stationary work!

## EASY CHANGE FILTERS

With just a few movements the filters on the WB2500 can easily be changed. Simply unclip the cover and twist the brace to drop the 24" x 24" pleated filters and lift the new filter into place, then twist the brace again and replace the cover.
